- **Read and Report: Energy Sources - http://www.c2es.org/energy/sources**
    - 5 groups - petroleum, natural gas, coal, renewables and nuclear
    - Address:
        - Summary of key facts
        - What did you learn from this reading?
        - What was most interesting and/or surprising to you?
        - What do you think of the source? Does it seem trustworthy?
        - What are considerations you think we should make using this resource?
        - What is the long term potential of this resource as an energy source?
        - How might our use of this resource change in the future?

- **Read and Report: Energy Uses - http://www.c2es.org/energy/uses**
    - 5 groups - electricity, transportation, industrial, residential & commercial, agriculture
    - Address:
        - Summary of key facts
        - What did you learn from this reading?
        - What was most interesting and/or surprising to you?
        - What do you think of the source? Does it seem trustworthy?
        - What resources are used in this sector?
        - How might this sector adapt moving forward?
- **Read and Report: Climate Techbook - http://www.c2es.org/climate-techbook**
    - electricity, transportation, industrial, residential & commercial, agriculture
    - Assignments
        - Residential & Commercial
            - Residential End-use Efficiency
            - Smart Grid
            - Lighting Efficiency
        - Industrial
